"We are indeed astonished to note the vast amount of daylight created by this paint—especially where we were formerly forced to use electric lights all day. We now find it entirely unnecessary. Agreeably surprised to observe how easy it is to keep clean."

—Knotair Hosiery Co., Philadelphia, Pa.

## 3,000 other users confirm what this one says

The fact that over 3,000 plants use and praise Rice's Mill-White entitles it to your investigation if you are considering repainting. Many of the biggest American Mills are numbered among our customers.

Rice's is the original "mill-white." All others are imitations. It is the **only** gloss paint which contains no varnish. For that reason, we **guarantee** that if Rice's does not remain white longer than any other gloss paint—applied at the same time and under the same conditions—we will give free, enough Rice's to repaint the job with one coat. We also guarantee that, properly applied, Rice's will not flake or scale. You cannot lose under this guarantee.

# RICE'S GLOSS MILL-WHITE

### On concrete surfaces

On inside concrete, Rice's Granolith makes the best possible primer for a second coat of Rice's Gloss Mill-White—giving a tile-like enamel finish at no more expense than lead and oil paint.  
Rice's Granolith

Sold Direct From the Factory

in barrels containing sufficient paint to cover 20,000 square feet—one coat.

## HUMIDIFYING

If you of the United States or Canada have a problem of humidifying then you need us—or rather you need the Turbo Humidifier.

The Turbo was invented by a mill man with no thought other than to use it in his own mill. Its success—being based on sound fundamental laws—was assured.

Guaranteed humidity was something we were responsible for and Turbofied and satisfied have become synonymous in textile parlance.

Catalogue for the asking.

## MILL PIPING

One of the reasons we are doing humidifying is that mill piping has been our business for forty-one years.

The two went very naturally together.

If your problem of mill piping is in our baliwick we would like to be of service.

When, however, local conditions preclude, we recognize them and tell you so, frankly. For the present we are able to give the best service in New England, New York State and Virginia and such points from Norfolk as afford good freight service.

## HOT WATER HEATING

Hot water, mechanically circulated, is the cheapest way to warm textile mills, under any condition.

This class of work, however, is a specialty; requiring a special experience which we have to offer.

Rule of thumb and guess work must be eliminated to give satisfactory results.

Heating and humidifying problems are very closely related. By looking at the whole problem from your standpoint we can save you money.

Our field in this line the United States and Canada.

## MILL SUPPLIES

Where we can properly serve, our stock of pipe, fittings, valves and such is offered you.

The nature of our business precludes the use of competition goods. We keep good material and lots of it.

Where service in the way of prompt shipments, right prices and good goods are desired, we would welcome a trial.

This applies principally to New England and New York State.

## Midgley's Improved Hand Stripping Cards

NUMBER 3

Attached Wood and Aluminum Handle,  
Exact Shape of Old Wooden Style.

Patented  
Universally

Manufactured Only  
By Us

### *Advantages Over the Old Style Wooden Card*

In our improved Hand Card we eliminate the possibility of splitting board or handle by substituting material practically indestructible. We use no leather bindings, tacks or nails. Our Improved Steel Clamps protect the edges of the Card as well as clamp them to the board, and present a smooth face to the Card Clothing. We punch teeth through this

clamp, giving you a holding point every quarter of an inch in place of the tacks formerly used.

Provision is made for attaching of strap to protect fingers; leather can be wound on end of handle if desired.

### *Mill Men Say:*

"We like the new cards very well, and you may send them on all our future orders."

# A DIRECTORY OF Textile Brands and Trade-Marks

The lines of textile products, including yarns, cloth, garments, and fancy goods which are now being sold under trademarks or brand names count up into the thousands and the number is rapidly increasing. Owners of trademarks are spending vast sums of money to advertise them to the consumers. The great number of branded and trade-marked goods makes it impossible for the jobber, department store or retail establishment buyer to know the first-hand distributors of all these various products and there has been no registry or directory which gives this information covering the textile industries. The Patent Office in Washington gives only registered names and marks, which are not suitably indexed for ready reference. There are thousands of others.

## A COMPLETE DIRECTORY TO BE PUBLISHED

As publishers of the Textile World Record, a journal devoted to the manufacture of textiles, and of the Official American Textile Directory, we are constantly called upon to give this information, and have gradually accumulated a vast amount of such data which we are now adding to and will publish in complete directory form at an early date. It will contain upwards of 12,000 textile brands and trade-mark names. The need of such a publication is recognized in the trade, and with our experience, not only as publishers of the Textile World Record but also of the Official American Textile Directory, the American Directory of the Knitting Trade and the Knit Goods Trade, we feel confident that we know what is wanted and will supply it.

This directory will give the following information:

Name of trade-mark or brand (both registered and unregistered)  
General character of goods  
First hand distributors  
Whether sold direct to the retail trade or to jobbers only

The above information will be inserted briefly in the directory **without any charge to owners of the brands.** The brand names will be arranged alphabetically.

The book will be widely circulated among the buyers in the jobbing houses and large department stores and retail establishments, and will be a constant source of reference during the year.

**To owners of advertised brands** it affords the opportunity of placing permanent reference data about their products in the buyers' hands, telling them what the goods are, prices sold at, how they are sold, what the advertising plan is, etc.

It is our intention to include every brand name of any textile article having cotton, wool or silk as a basis, whether spun, woven, felted or knit, wearing apparel, etc., or any textile product sold under a brand name or trademark, whether registered, **or not.**

We have the Buyers' word for it that such a directory will be appreciated by them more than they can express, and is what has been long looked for. The book will be well printed and substantially bound. Price will be \$3.00. (Cheaper binding \$2.00).

**Lord & Nagle Company, Publishers,** 144 Congress Street,  
BOSTON

OUR NEW

# Hand-Threading Shuttle

**Is the Simplest  
Most Effective and  
Most Quickly Threaded  
Shuttle Made**

¶ Can be operated with the finest silk or the coarsest filling. ¶ Will not unthread when the yarn "balloons." ¶ Provision is made for easy removal of lint that may accumulate in the threading device. ¶ There is room for the insertion of felt for tension purposes. ¶ It complies with the Massachusetts sanitary shuttle law, and as other states are likely to enact similar laws, it is well to anticipate trouble by adopting this new shuttle.

Is Your Protection

It appears on each stick of Genuine Stephenson Bar Belt Dressing—the dressing that has held to its uniform quality for 23 years.

This belt dressing surpasses liquid preparations, for there is absolutely no waste in applying it to the belt, and it is put up in sticks or solid form, so that it can be carried about in the tool-box. For these reasons—

**1 Pound Lasts as Long as 2 Pounds of  
Any Liquid or Semi-Liquid Dressing.**

There are two brands, Red Label for leather belts, Green Label for rubber, canvas, or balata belts.

# The Reece Hand-Hole Button-Hole MACHINE

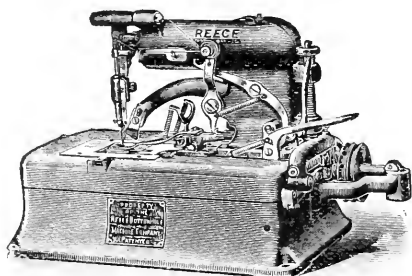

**For Stitching and Cutting  
Button Holes in Sweaters**

has twice the capacity of any other button-hole machine. It is simple, speedy, easily operated, and makes a perfect one or two cord button hole that is stronger and better looking than a hand made one. The machine can be used on all sweater work, with or without canvas or other staying qualities.

# The Reece Button-Hole Machine

**For Cutting and Stitching Straight Double  
Barred Button-Holes in Knit Goods**

makes button-holes from  $\frac{1}{8}$  to 1 inch long. Being automatic, its capacity, even with unskilled labor, is double that of any other machine. The superior quality of the work is due to the elastic stitch—no cutting or pulling of the thread is necessary—when taken from the machine the button-hole is complete. Samples of work and terms on application.

# Perkins' Profit Promoters

## The Textile Fabric Tester

*The only machine that gives the bursting strength in pounds per sq. in. by a simple operation.*

## The Jumbo Mullen Tester

Is extensively used by hosiery and underwear manufacturers. It is equally good for testing textile fabrics of all kinds.

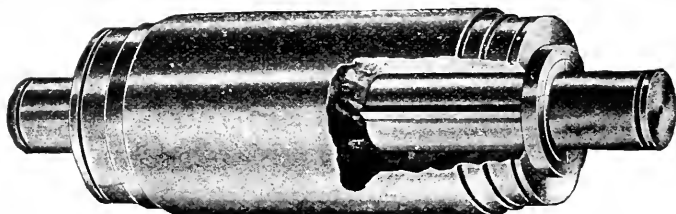

### Here are Proofs of Quality

1. The U. S. Government adopted Mullen Testers as the standard for testing paper.
2. The R. R. Freight Classification Committee adopted Mullen Testers as their standard. Every fibre case shipped bears a stamp to show that it will stand "a resistance of ... pounds to the sq. in. [Mullen test]."

Ask for descriptive matter and names of

### TEXTILE MILLS

using the Jumbo Mullen Tester

## Perkins Guaranteed Calendar Rolls

For Finishing Textile Goods, Bleaching and Dyeing Cloth, etc.,

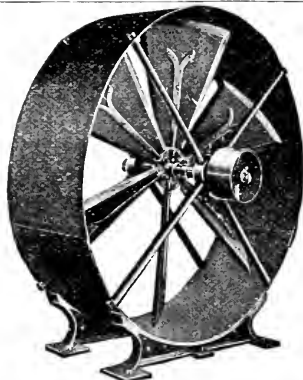

are filled by a patented mechanical process, which insures perfect uniformity in density, a feature which is impossible with the ordinary hand-made rolls. The line includes: Paper Rolls, Husk Rolls, Cotton Rolls and Combination Cotton and Husk Rolls. All are fitted with Perkins' Patented Spline, which prevents slipping or turning around the shaft.

## For All Mill Needs—Get A Perkins Ventilating Fan

*It is Superior Because:*

- (1) The frames, drums, arms, shafts, etc., are STEEL—not iron.
- (2) The blades are adjustable—can be set to any angle—to blow in or out.
- (3) It can be run at high speed—and will run longer without oiling than any other fan on the market—on account of the *self-oiling journal boxes*.

Power Transmission Systems built and installed for driving any fan in any position.

# The Flat Steel Heddle

## AND Universal Frame

Are playing today a very prominent part in the efficient running of looms

A LARGE percentage of Manufacturers realize the great importance of the Steel Heddle—the heddle punched from *flat cast steel*—with the round cornerless eye, that cannot catch, rub or chafe or pull the Warp Thread—the heddle that adjusts itself automatically on the frame—the heddle that cannot twist or bend while at work.

## THE UNIVERSAL FRAME

Stationary Hook Equipment

### Single Iron End "Universal" Frame

Patented

Sliding Hook No. 4 Equipment

is used in hundreds upon hundreds of Textile Mills. Why? Because it is built for service—for efficiency—for durability. It is built for real economy—not the fake economy of an original low price. You can have the *Universal Frame* built to fit the peculiar conditions of your mill and your product.

### COTTON, SILK, WORSTED or WOOL THERE IS A HEDDLE AND FRAME FOR THE WORK

*From fancy cotton shirtings to canvas—from narrow fabrics to broad silk—from light worsteds to heavy woolen cloths, there is a heddle and frame for your particular kind of work.*

We are manufacturers of the best drop heddle the market ever produced. We are makers of the best finished drop heddles and wires you ever had in your mill.

The "Made in America" cast steel Reed Wire, which has created quite a sensation, for all kinds of Reeds, is made in our plant.

These are facts. Their efficiency has been proven so often that the novelty is lost. Do you want a list of users in your particular line? Write to these people yourself. They'll tell you what Steel Heddle Equipment has done for them.

SEEING IS BELIEVING

## ROCO COUNTERS REGISTERING YARDS and PICKS on a WHITIN LOOM

The yard counter is driven from the sand roll by two bevel gears—the pick counter is driven from the crank shaft and registers every thousand picks. The counters work independently, either one or both may be used.

These are samples of the innumerable applications of our counters. They are adaptable to all textile needs and are necessary where accuracy in counting and cost estimating is desirable.

We make the Bristol, Elm City and Roco Counters, in different styles, for use on looms, balling machines, twistors, dressers, folders, printing and rolling machines, tenter frames, warpers, slashers, etc.

# KLAUDER - WELDON

ORIGINATORS, PIONEERS and  
LEADERS IN THE MANUFACTURE OF

**Dyeing, Bleaching and Scouring Machines**

THE fact that Klauder-Weldon Machines have always been recognized as the standard of economic efficiency in Dyeing, Bleaching and Scouring is sufficient reason to believe that they have merits that justify your most careful investigation.

Klauder-Weldons are used in over 1000 textile plants and are built to handle textiles in all forms and processes.

# Brown Spin-Wright Cotton Co.

32 UNION SQUARE, NEW YORK, N. Y.

---

## To Textile Users:

Spindles driven by the Brown patented herring-bone perforated steel band into small herring-bone gears on spindle base insures absolutely positive spin and twist. All frames are also geared from the drive shaft to the spindles—to the front rolls—to the travers, and builder motion, or to any mechanism used as a take-up, thus making it positive in all its running parts.

Our New Bedford office is running a standard 240 spindle cotton frame and demonstrating what our system of drive will do in spinning and twisting cotton, of the coarsest numbers to the very fine, such as 100s to 200s or even finer than 200s.

For further particulars address BROWN SPIN-WRIGHT COTTON COMPANY, 32 Union Square, New York City, or 1502 Purchase Street, New Bedford, Mass.

## Oilless Bearings

are made of wood chemically treated. They do away with oil, lost time, excessive depreciation, make a cleaner factory, and reduce fire risks.

They are adapted for loose pulleys, friction clutches, counter-shafts, fans, confectioners, electrical, harvesting, insulating paper-box, printing, shoe, spinning, textile, weaving and winding machinery.

Write us and find out just what they will do for you.

# The Palmer Improved Adjustable Thread Guide

**For Ring Spinning and Twisting**

Clamp Plate

**2,500,000**

**in operation**

Patented in U. S., July 24, '06, Apr. 9, '07, June 4, '07, Apr. 7, '08, Apr. 21, '08; Austria, Dec. 1, '07; Canada, Sept. 26, '08, May 12, '08; England, July 24, '06, Aug. 29, '07; Belgium, July 24, '06, Nov. 14, '07, Dec. 19, '07, Dec. 28, '07; France, Oct. 2, '06, Dec. 14, '07; Italy, July 24, '06, Feb. 28, '08; Spain, Sept. 3, '06, April 8, '07, Nov. 27, '07, Feb. 28, '08, Feb. 22, '08; Switzerland, June 30, '07, Feb. 26, '08; Japan, Oct. 12, '06, Sept. 30, '07; India, Feb. 19, '07, Mar. 20, '07. Patents applied for in the United States, Germany, Russia and Poland.

This guide supplies an accurate, rigid and permanent adjustment and is attached to the ordinary spinning frame clapper. It has more merits than any other adjustable guide and at a greatly reduced cost. Perfect adjustment saves broken ends, abnormal wear of the rings, and increases the production and quality. Will soon pay for itself.

Our latest Patented Finishing Presses have Quick Speed and Rolling Motion, insuring much greater pressure than can be obtained in other movements.

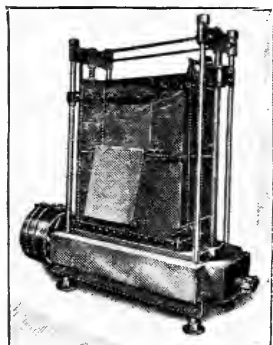

Plates have no raised surface to catch papers.

Toggle Baling Press

3-Roll Automatic Calender, Adapted for all Cotton Goods Requiring a Nap Finish

Double Screw Baling Press

# The Number and the Kind of Mills

Reported in the OFFICIAL AMERICAN TEXTILE DIRECTORY,  
Arranged by States

The number of mills in the "total" column is larger than the actual number of separate establishments reported, because where a mill comes under more than one classification, for example, Cotton and Woolen, or Knitting and Silk, etc., it is counted in each classification, which makes duplication in some cases, particularly in Pennsylvania.

## REWARD

To the person who shall *first* inform us of any cotton, woolen, knitting silk flax or jute mill, print works, dyeing (except job dyeing), bleaching or finishing establishment in the United States or Canada\* which was in operation on Feb. 1, 1915, and which is erroneously omitted from this Directory, we will pay \$1.00 on the following conditions:

Full and complete information concerning the mill must be sent. By that we mean the name of the company, where located, names of the officers, including superintendent, class of goods made, capacity in machinery, that is, number of spindles, cards, looms, etc., kind of power, whether a dyehouse or not, name of buyer and selling agents.

We will pay the same reward to the first person who informs us of any mill reported as a going concern, which was out of business Feb. 1, 1915.

In recognizing claims for reward, we can only consider them with reference to the circumstances on Feb. 1, 1915, as it is manifestly impossible to include or omit mills which may have started or stopped subsequent to date of compilation.

We especially invite the co-operation of traveling salesmen in the correction of any errors that they may discover.

No other Directory publishers have yet dared to offer rewards for the discovery of inaccuracies.

\*The offer of reward does not apply to small custom carding mills with only one or two custom cards for country rolls, to knitting mills with less than four power machines, or to braiding or wire covering establishments.

## EXPLANATION OF MAPS AND GENERAL ARRANGEMENT.

---

The Directory is illustrated by copyrighted maps of the principal manufacturing states east of the Mississippi River, and the Provinces of Quebec and Ontario, showing the location of the textile mill cities and towns. These maps are engraved especially for the OFFICIAL AMERICAN TEXTILE DIRECTORY, and are arranged with special reference to the convenience of those desiring to reach the textile establishments. The Southern, Western, and Central States are arranged in groups; most of the New England and Middle States are shown with separate maps for each State. Under each State heading at the top of right hand pages reference is made to the page of map for that State.

The State maps are divided into square sections, designated by letters and numbers. In the body of the Directory, after the name of the city or town, the square in which it is located on the map is designated thus, in the case of Passaic, N. J.—“Passaic, D-9;” meaning that Passaic will be found in the horizontal section D and the vertical section 9 of the New Jersey map.

Following the letters indicating the location of the town will be found abbreviations of the railroad connections, which will enable one to refer intelligently to any railway guide for his train connections. If the town is not on the railroad, the nearest railroad station is given and the distance from it. The population of the place follows the railroad abbreviations.

It should also be carefully noted that each square is a certain number of miles. Under the title of each map will be found the scale of miles to each square in that map. In this way distances can be very closely approximated, and railroad fares estimated on computation of about 2½ cents per mile in the Eastern States, and 2½ to 3 cents in Southern and Central States for local travel.

The classification of the mill section of the Directory is first, alphabetically by States; second, alphabetically by towns and cities in each State; third, alphabetically by name of mill, under its proper post office address. In some instances the railroad and freight station is not the same as the post office address, and in these cases the proper railroad station is designated.

---

## EXPLANATION OF ABBREVIATIONS.

---

Under each city or town are grouped *all* the textile mills in that place, without regard to kind of goods made. The kind of mill, i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows:—

**C** means cotton mill.  
**J** means jute mill.  
**Bl** means bleachery.

**W** means woolen mill.  
**K** means knitting mill.  
**F** means finishing works.  
**Fl** means flax mill.

**S** means silk mill.  
**D** means dyeing establishment.  
**Pr** means print works.

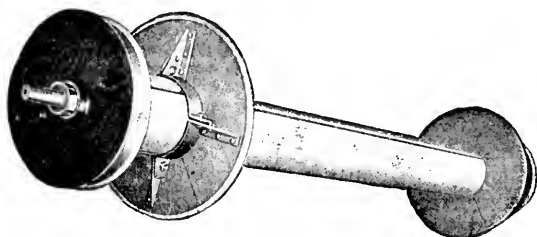

**POWER.** The kind of power is designated—steam, water or electric.

**DYE.** If the mill has dyeing facilities, the word “dye” is used.

**S. AGTS.** means selling agents. The other abbreviations will be easily understood.

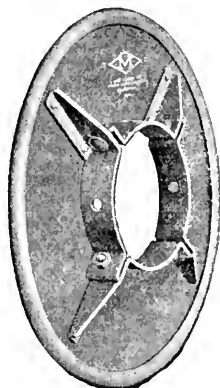

**BUYER.** In most instances the name of the man who does the buying is given for the larger mills. In smaller mills, or those operated by individuals, the principals usually buy.

**POP.** Population.

# LOGWOOD

The STANDARD BLACK for WOOL  
The ECONOMICAL BLACK for COTTON

---

---

LOGWOOD BLACKS can be dyed absolutely at the lowest cost of any possible black.

LOGWOOD BLACKS when properly dyed are handsome and permanent; they do not redden with age but retain their original rich tone and beauty of shade.

LOGWOOD BLACKS add weight; improve the feel of goods and give a depth of shade which can be produced in no other way.

LOGWOOD BLACKS would solve many of your problems.

**Look for our name on your shuttles and bobbins. DRAPEE COMPANY, Hopedale, Mass.**

## Does It Pay

Does it pay to use the product of modern thought? What it does is evident on every hand.

# Wyandotte Textile Soda

is a progressive article. To the fact that its work is an improvement on the work of other chemicals is due its success and rapidly increasing popularity.

You are taking advantage of the opportunities offered in other lines, but how about your alkali account? If you are not using Wyandotte Textile Soda you are losing advantages which are enjoyed by those who do.

We also manufacture Wyandotte Concentrated Ash which for some purposes we recommend as strongly as we do Wyandotte Textile Soda for others.

Think it over and we believe you will see the wisdom of telling us what you make, and of asking whether or not you can use one or both these materials to advantage. If you cannot use them, we will tell you that you cannot. If you can use them, we will tell you how and where. Order from your supply house.

## Dependable Yarns for All Silk and Silk-Mixture Goods

Hundreds of prominent manufacturers of silk and silk-mixture goods have found it profitable to use and *continue* to use

### *Cheney Silk Yarns*

as the basis of their products. These manufacturers are putting out quality goods and naturally require *quality yarns*. No better proof of the quality of Cheney Silk Yarns can be found than the fact that such manufacturers have sufficient confidence to buy them regularly and place their own names on the finished product.

Resist-dyed yarns for cross dyeing of woollen mixtures, special silks for electrical and insulation purposes, and all other specials or staples, delivered promptly. Quotations and samples gladly sent.

## CHENEY SILKS

are of superior quality, and include practically every kind of goods made of silk—whether for dresses, millinery, decoration or upholstery, the haberdasher or manufacturer, man or woman.

CHENEY BROTHERS.

*Silk Manufacturers*

4th Avenue and 18th Street, New York

# The Yarn Trade Index

In this department will be found classified lists of manufacturers of different kinds of yarn, who sell their product. So far as possible the sizes of yarn which are made are given and the form in which the yarn is put up. Dealers and commission merchants are not included in this list. There is a separate list following the list of yarn manufacturers in which are included such firms.

The publishers will be pleased to receive notice of any corrections that should be made.

If any kinds of yarn are wanted which are not found in these classified lists, the publishers can probably supply the addresses of manufacturers or dealers from whom they can be obtained.

## COTTON KNITTING YARNS.

### Carded Mule Spun.

Argo Mills Co., Gloucester City, N. J. 10s to 100s; cops, cones, skeins.

# Sent Free

A Complete Catalog of all

# Textile Books

OUR descriptive catalog contains a list of all the books in the English language on textile subjects that are in print and that are of present value, classified under the different subjects to which they pertain. This catalog should be in the possession of every mill man. It will be sent free upon application. New books on textile subjects are being published frequently. We can supply any textile or technical book, whether of our own publication or not, at lowest prices. We can also give information and prices of foreign textile publications, etc. We are headquarters for everything in the line of textile literature and information.

**MERCERIZERS  
CONERS and WINDERS  
DYERS of COTTON  
SKEINS and WARPS**

**FINE YARNS and CROSS  
DYE  
A Specialty**

Have You Ever Stopped to Consider What Tangles and Tears Your Skein Yarn, what causes so much waste, why there is so much trouble in your winding, and so many knots in your yarn? Have you ever examined your dyesticks, dry poles and your trucks, to see if your sticks are smooth, and that your trucks have no places for yarn to catch on and tear the skein? It would pay you to go over these things once in a while. This would save burling and mending, and would help your production in the loom.

I am now supplying over 700 mills and dye houses in U. S. and Canada with DYE STICKS, drying and sulphur house poles, wringing sticks, trucks for dry rooms, dye houses and mill purposes. My trucks have self-oiling wheels. They are smooth. Yarn will not catch on them. They are properly balanced. I build any truck required.

Let me know what you need. Give me a chance to demonstrate my goods.

## The Chemistry and PRACTICE OF SIZING

(Ninth Edition)

BY BEAN AND SCARISBRICK.

**N**EARLY all cotton manufacturers would be astonished if they could see the economy that is possible in the sizing of their yarns. Some mills are paying more attention to their sizing as a means of decreasing cost at the slasher, increasing output in the weave room and improving the quality of work.

Recognizing the importance of the subject the *Textile World Record* has borne the expense of publishing an American edition of THE CHEMISTRY AND PRACTICE OF SIZING and now offers to American cotton manufacturers the best ideas of the foremost English textile chemist collaborating with a practical sizer of large experience, written in a practical manner. Their combined work is recognized as standard in all countries where cotton manufacturing is carried on.

THE CHEMISTRY AND PRACTICE OF SIZING is a large substantial book of 650 pages, printed on fine coated paper, with numerous illustrations and plates, and bound in cloth. All the mechanical features are of high quality in keeping with a work of its importance.

We do not hesitate in saying that this is the most valuable work of the kind that ever has been offered to American cotton manufacturers. It offers you the best ideas of men with every resource in the form of opportunities, training, experience and personal fitness for the task of improving your sizing.

The price is \$8.00, which includes payment of express charges to your address.

# MILLS CLASSIFIED ACCORDING TO PRODUCT

Yarn mills will be found in the Yarn Trade Index, beginning on page 3-5.

Knitting mills are not included here, as separate classified lists in great detail are contained in the American Directory of the Knitting Trade; price \$1.50.

Full particulars and data about mills in the following list will be found in the Mill Section of the Directory, where they are arranged according to location. Quick reference to each mill may be had from the Alphabetical Index to Mills.

## MANUFACTURERS OF COTTON GOODS.

The classifications of manufacturers according to product are arranged alphabetically under the following headings. Some fabrics are not listed separately, to avoid duplication, but the headings under which they will be found are indicated in this index, as for instance, "Canton Flannel, see Flannel, Cotton."

Absorbent Cotton.  
 Awning Cloths, see Tickings.  
 Bagging.  
 Batting.  
 Bed Spreads.

# NEW Textile Books

*Published Since Last Edition of  
This Directory*

Color in Woven Design (New Edition), by Beaumont ..	\$6.00
Fibres Used in Textile and Allied Industries, by Mitchell and Prideaux .....	3.00
Productive Costs in Cotton Spinning Mills, by Hardman ..	1.50
Textile Design, by Woodhouse and Milne .....	3.25
Chemistry and Practice of Sizing (New Edition), by Bean and Scarisbrick .....	8.00
Cotton Year Book .....	1.00
Manual of Cloth Finishing (For Woolen and Worsted) by the Editors of the "Dyer and Calico Printer" ..	6.50
Wool Growing and the Tariff by Wright .....	2.00
Wool Year Book .....	1.00
Worsted Preparing and Spinning (vol. 1) (vols. 2 and 3 to follow), by Bradley and Buckley .....	1.50
Chemistry and Practice of Finishing (2 vols.) by Bean and McCleary .....	15.00
Dressings and Finishings for Textile Fabrics and Their Application, by Polley .....	3.00
Manual of Dyeing (2 vols.), by Knecht, Rawson and Loewenthal .....	12.00
Principles of Bleaching and Finishing of Cotton, by Trotman and Thorp .....	5.00
Wool Carding and Combing, by Barker and Priestman ..	1.50

*New and Complete Catalogue of Textile Books Sent Free on Request*

## LORD & NAGLE COMPANY

Textile Publishers

144 CONGRESS STREET

BOSTON, MASS.

## Philadelphia Textile School

OF THE

PENNSYLVANIA MUSEUM AND  
SCHOOL OF INDUSTRIAL ART

International Reputation for Practi-  
tical Instruction, Adequate Me-  
chanical Equipment, Suc-  
cessful Graduates

*32nd Season opens September 20,  
1915*

Courses of Study include all branches  
of Textile Manufacture

Cotton, Wool, Worsted, Silk

*Illustrated Circular and Advice as to  
suitable Courses of Study sent on  
application to*

**E. W. France, Director**  
Broad and Pine Sts., Philadelphia

## The Bradford Durfee Textile School

Fall River, Mass.

has had the largest enrollment and  
attendance this year in its history.  
It offers the following courses:

- No. 1 General Cotton Manufactur-  
ing, three years
- No. 2 Designing and Weaving,  
two years
- No. 3 Chemistry and Dyeing, two  
years
- No. 4 Engineering, Steam and  
Electricity, two years
- No. 5 Freehand Drawing and  
Textile Design

Many of the graduates are filling  
responsible and remunerative posi-  
tions.

Tuition free to residents of Massa-  
chusetts

Free catalog upon request.  
Call at the School or address

**Everett B. Durfee, A. M.**  
PRINCIPAL

## Lowell Textile School

Scientific and practical training in  
all processes of textile manufacture  
including all commercial fibres. Com-  
plete three year diploma courses in  
Cotton Manufacturing, Wool Manu-  
facturing, Textile Designing, Chemis-  
try and Dyeing, Textile Engineering.

Degrees of B. T. E. (Bachelor of  
Textile Engineering) and B. T. D.  
(Bachelor of Textile Dyeing) offered  
for completion of prescribed four  
year courses.

Certified graduates of High Schools  
and Academies admitted without  
examination.

*For Catalogue address*

**Charles H. Eames, S. B.**  
PRINCIPAL  
Lowell, Mass.

## The New Bedford Textile School

This school is located in New Bedford,  
Mass., an attractive residential city situ-  
ated on Buzzards Bay, and the largest pro-  
ducer of fine cotton yarns and fancy woven  
fabrics in this country.

Three year diploma courses in the follow-  
ing subjects: Cotton Manufacturing; Tex-  
tile Designing; Textile Chemistry; Dye-  
ing and Finishing; Seamless Hosiery  
Knitting; Latch Needle Underwear Knit-  
ting. Mechanical Drawing, machine shop  
practice, steam and electrical engineering  
as applied to textile plants, given in con-  
nection with the above courses.

Special shorter courses in the above sub-  
jects, for which certificates are given, may  
be arranged by students desiring them.

*Every instructor is a man of special  
training and broad practical experience*  
Sixteenth year. Many graduates filling  
remunerative positions of trust and re-  
sponsibility.

*Illustrated catalogue sent free on  
application to the school*

**William E. Hatch, A. M.**  
President and Manager

# Problems in Dyeing

**WE** are prepared to dye any shade upon any fabric submitted, or we will match any required shade and submit exact dyeing directions. Information of a technical nature cheerfully given. No charge is made for such service, and in accepting it there is no obligation to purchase from us any thing that you can buy or that you think you can buy to better advantage elsewhere

**MONTREAL . . . 59 William Street**

# ALPHABETICAL INDEX

TO

## The Textile Establishments

### OF THE UNITED STATES AND CANADA

The following index is an alphabetical arrangement of all the textile establishments in the United States. Following the name and address of the establishment, the character of the mill is designated by letters, thus:

(C) means a cotton mill (K) means a knitting mill (Bl) means a bleachery  
(W) means a woolen mill (Fl) means a flax mill (F) means a finishing establishment  
(S) means a silk mill (D) means a dye works (J) means a jute mill

The number which follows indicates the page upon which the full particulars of the mill will be found.

It frequently happens that an establishment is listed under two names, viz.: proprietor's or company's name and also the name of the mill, as, for example, Wm. F. Read & Sons Co., Victoria Mill, Philadelphia, Pa. In the alphabetical index this is listed as follows: Wm. F. Read & Sons Co., Philadelphia, Pa., also Victoria Mill (Wm. F. Read & Sons Co.), the page number being given in both instances, but in the case of the second name the address is not given, so that if this index is used for addressing purposes, no duplicates will be made if directed only to the names which have addresses.

As the body of the Directory is arranged alphabetically by states, towns and establishments, it is, therefore, self-indexing, and any mill can readily be found through one or the other system of classification, viz., by its name in the alphabetical index or by its location in the body of the book, where full particulars about each mill will be found.

## Z

## Supplements to this Directory

Each month's issue of the Textile World Record contains a carefully classified record of new mills, enlargements, improvements and changes. The December number of the Textile World Record contains the Annual Report of New Mill Construction and important changes for the year. As this is issued six months later than the directory it forms a semi-annual supplement.

The combination price of \$3.00 covers the cost of the Directory (travelers' edition) and a year's subscription to the Textile World Record.

## Textile Advance News

Machine builders and others selling the textile mill trade who desire early and more complete investigated information of projected new mills, enlargements and improvements, changes, etc. (in most instances before orders are placed), can obtain it through the TEXTILE ADVANCE NEWS, at \$15.00 per year.

Established twenty years ago, this the original textile news service is the most complete, systematic and accurate of any.

**Lord & Nagle Company**  
Textile Publishers, Boston

## TOO LATE FOR CLASSIFICATION.

New Mills and Changes in Old Mills reported too late for insertion in proper place in Mill Section.

California, Los Angeles. Myers Mfg. (K Co.); 258 So. Los Angeles St.; E. B. Myers, pres.; Benj. D. Potter, supt.; Knit Bathing Suits and Jerseys; 3 knitting and 3 sewing machines; electric; sell direct.

# A REVELATION IN EFFICIENCY

## The K-A Electrical Warp Stop

A Mill Manager who had purchased some "mechanical" warp stops was induced to try K-A. Result: He equipped the balance of his mill with K-A, and said he had made a mistake in his first selection. ¶ A Worsted Mill, after equipping 90% of its looms with another warp stop, adopted K-A for the rest.

*Mill Men, in new positions, who have used other warp stops, select the K-A.*

*Some mills have abandoned other kinds of warp stop and have substituted K-A.*

**The Mossberg Wrench Co., Central Falls, R. I.**

## SIM-PULL and SIM-PLEX AUTO-LOCKING BELT SHIFTERS and COUNTERSHAFTS

AWARDED A GOLD MEDAL BY THE  
AMERICAN MUSEUM OF SAFETY

AT THE  
SAFETY and SANITATION EXPOSITION, DEC., 1914  
IN NEW YORK CITY

*Recognized as Approved Safety Devices by  
State and Corporation Inspection Departments*

The belt is locked against creeping. A PULL unlocks, shifts and relocks the belt.

"Arguto Oilless" Bearing in the loose pulley removes a dangerous oiling operation.

"Bristo" Safety Set Screws in pulleys. Used by mills as well as by machine shops.

***Insure Against Compensation Claims***

BY INSTALLING

***SIM-PULL and SIM-PLEX BELT SHIFTERS***

# REASONS WHY MEN ADVERTISE IN THE Textile World Record

A CONTINUOUS, steady growth in advertising patronage is conceded to be one of the best evidences of a medium's advertising value. THE TEXTILE WORLD RECORD has grown steadily in advertising month by month, year by year—always gaining—never going backward.

This publication covers fully seven-eighths of the entire textile industry. About \$2,000,000,000 are invested in the manufacture of textiles in the United States alone.

The textile industry's expenditure for new mill construction, enlargements and improvements, replacement and addition of equipment, machinery and supplies (exclusive of raw materials) is \$250,000,000 a year.

Every prominent maker of textile machinery uses THE TEXTILE WORLD RECORD'S columns—among its 400 regular advertisers there are very many who use no other textile periodical.

When one does not care to experiment with advertising mediums it is best to follow where successful leaders point the way.

THE TEXTILE WORLD RECORD'S circulation is guaranteed—Post Office receipts and subscription books open to all interested.

*Send for advertising rates, and other details.*
